

江苏省园博会综合服务中心和酒店

这个建筑位于江苏省园博会核心园区，作为园博会期间的公共服务设施使用，在园博会之后会被改造为一个酒店。基地紧邻园博园中心人工湖，其范围由不规则的湖岸和北侧的园区道路所界定，并包括相邻的一个小岛。

为了适应这个建筑在园博会期间和之后两种使用状态，我们把酒店的公共空间沿着蜿蜒曲折的湖岸布置在地面层，并因此界定和围合出不同的景观朝向和空间氛围。这部分空间可以方便园博会期间作为餐厅和其它临时功能的使用。酒店的客房被安排在二层和三层，呼应岸线的凹凸转折，被设计为一个折尺形的线性体量。因此客房获得了开阔的面向湖面和周边村落的景观，同时一个完整而连续的立面在尺度上呼应了基地所处的开阔场景。

建筑的立面材料也区分出上下两个部分不同的功用和性格。首层的立面是围合室外空间界面的白墙；二层和三层用重竹格栅包裹，为客房提供私密性和遮阳。格栅在阳台处可以滑动开合，形成朴素自然的立面表情。

业主：苏州太湖园博实业发展有限公司

地理位置：江苏省苏州市吴中区临湖镇

建筑面积：17340 m²

结构形式：混凝土框架结构+钢结构

设计团队：赵扬，李烨，尤玮

设计阶段：2014.08 - 2015.01

施工阶段：2015.02 - 2016.03

Service Center and Hotel for Jiangsu Horticultural Expo

This building is located at the campus center of Jiangsu Horticultural Expo. It will be used as public service facilities during the Expo and will be transformed into a hotel afterwards. The site's boundary is confined by the shoreline of the lake and a road at its northern side. The adjacent island is also considered to be part of the site.

In order to make the building adaptable to both using conditions, we arrange the public facilities of the hotel along the curvy shoreline and therefore create a series of interior and exterior spaces with varied orientations and atmosphere. The ground floor can be easily adapted to public service spaces for the Expo. The hotel rooms are arranged at the second and third level, responding to the shoreline, this part of the building is conceived as a zigzag linear volume, hovering above the lake. Therefore, the hotel suites enjoy the open view of the surroundings and the horizontal volume resonates to the grand scale of the context.

The choice of facade material also responds to the functions and characters of the building's upper and lower halves. The white rendering of the ground floor works as a neutral background for the exterior courtyards, while vertical louvers made from carbonated bamboo provide privacy and shading for the hotel rooms and gives the building a humble and natural appearance.

Client: Suzhou Taihu Lake Horticultural Expo Industrial Development Co., LTD

Location: Linhu Town, Wuzhong District, Suzhou, Jiangsu

Floor Area: 17340 m²

Structure System: Concrete Frame + Steel Frame

Design Team: Yang Zhao, Ye Lee, Wei You

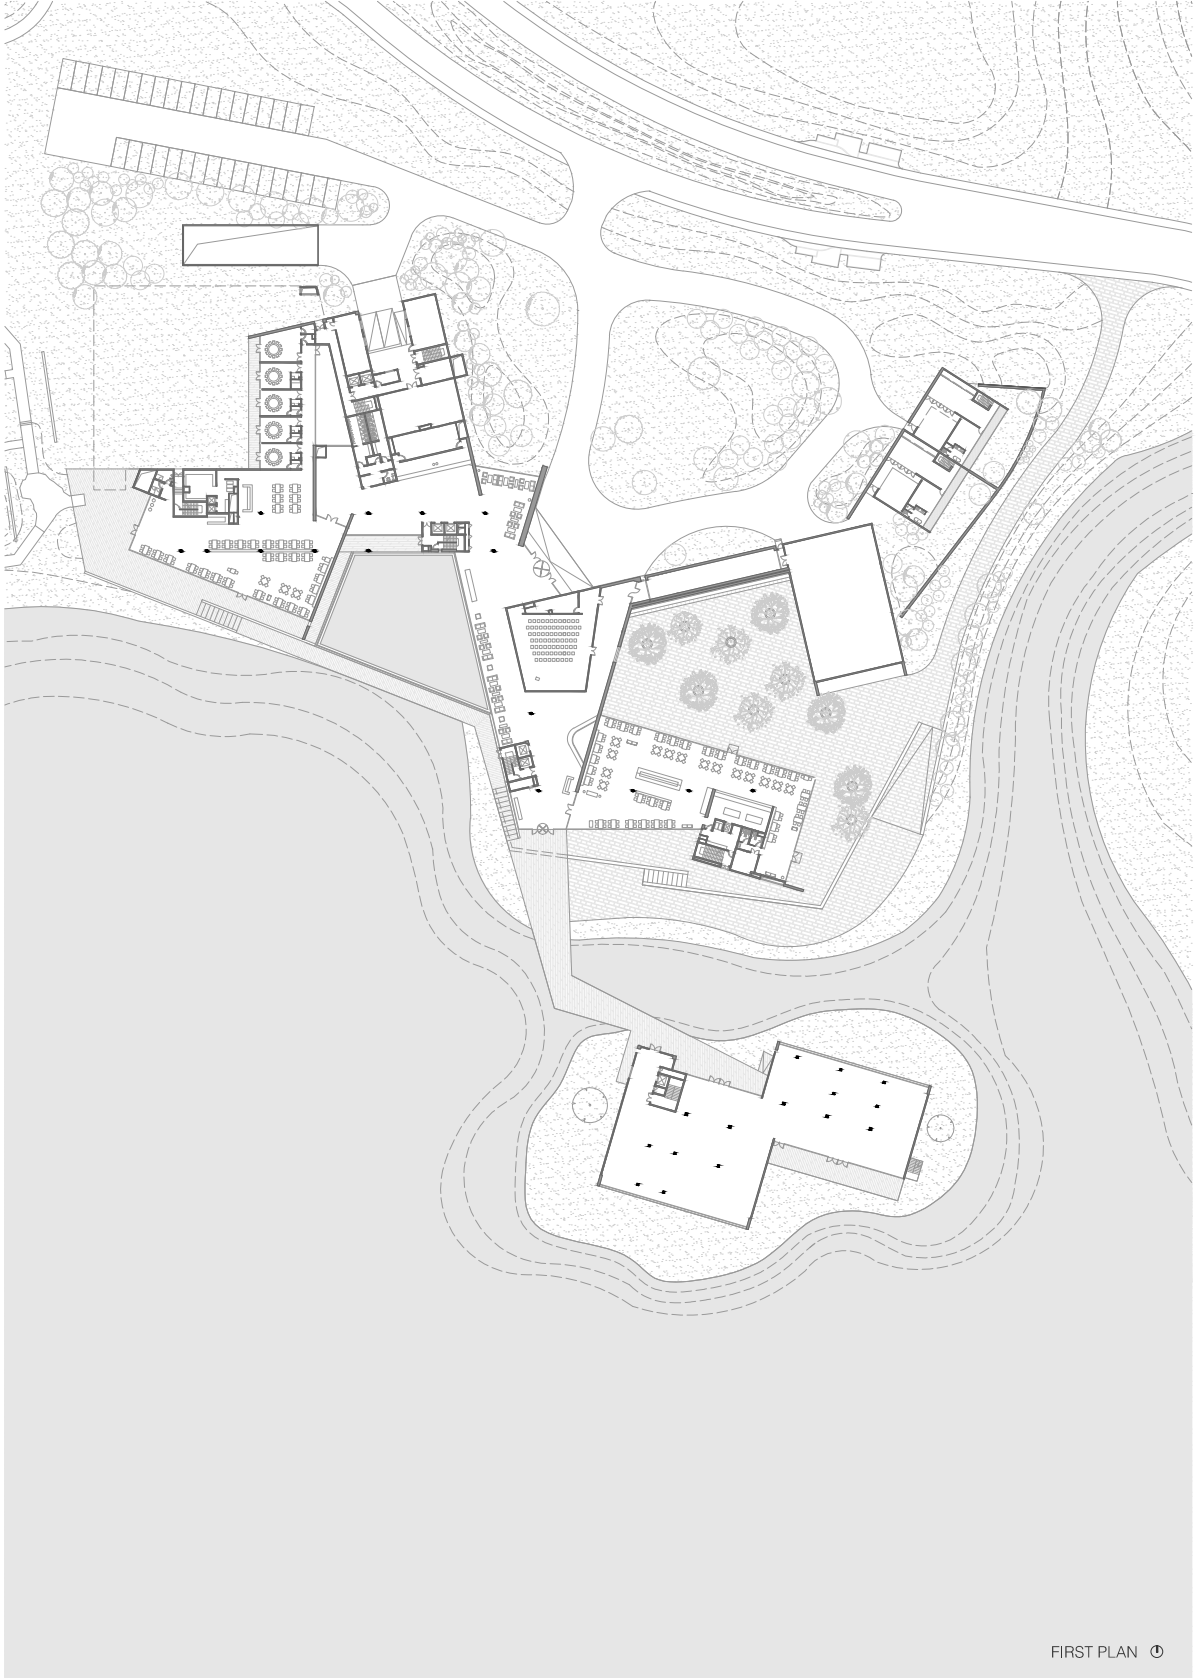

Design Phase: 2014.08 – 2015.01

Construction Phase: 2015.02 – 2016.03
